EDITION 1

## Green is all we do™

We make products with renewable, post-consumer recycled, or reusable materials,\* and care deeply about what happens to them after use.

This singular focus makes it possible for us to lead in ways that are hard to follow.

We deliver benefits to our partners that are unavailable anywhere else in the market.

ASSORTMENT

INNOVATION

SERVICES

ADVOCACY

\*Percentage of renewable and recycled material varies by product.  
Raw materials listed above do not include lining, coating, chemistry, or wax used to produce products.

Certified B Corps are companies that meet high standards of social and environmental performance, accountability, and transparency. Our B Corp Certification, and updated articles of incorporation from an INC to a PBC (Public Benefit Corporation) provide third-party certification that we are “walking-the-talk” and push us to be the best we can be.

The EcoVadis Rating covers a broad range of non-financial management systems including Environmental, Labor & Human Rights, Ethics & Sustainable Procurement impacts. Each company is rated on the material issues as they pertain to their company’s size, location and industry. The goal is to drive global supply chain sustainability - influencing spend as a “force for good” to push beyond compliance.

## ASSORTMENT

### Our Product Lines

We offer a variety of products that balance environmental, performance, economic, and market needs.

Our product assortment is divided into **three product lines** defined by raw material types and end-of-life potential.

## GreenStripe®

Made with Renewable Resources and/or Compostable

**Raw Materials:\***

Bioplastic, Paper, Sugarcane, Bamboo, PBAT

**Product Types:**

Cups, Containers, Lids, Dinnerware, Servingware, Bags, Cutlery, Straws

**End-of-Life:**

Compostable\*\*  
(certifications vary by product)

**Third-Party Verification:**

ASTM, BPI, CMA, DIN CERTCO

## BlueStripe™

Made with Post-Consumer Recycled Content\*

**Raw Materials:\***

RPET, RPS, or PCF

**Product Types:**

Cups & Lids, Container Lids, Cutlery

**End-of-Life:**

Recyclable  
(in select communities, varies by product)

## Veda™

Made with Durable Materials and Reusable

**Raw Materials:\***

Heavyweight Polypropylene

**Product Types:**

Take-Out Containers

**End-of-Life:**

Reusable  
Recyclable (via takeback program)

**Third-Party Verification:**

NSF, EcoLab

\*Percentage of renewable and recycled material varies by product. Raw materials listed above do not include lining, coating, chemistry, or wax used to produce products.

\*\*Commercially compostable only, which may not exist in your area.

## Certifications

### Compostability Standards, Certifications, and Approvals

A product is “compostable” if there is scientific evidence that it will break down or become part of stable compost in a safe and timely manner, in a properly managed commercial composting facility. We rely on third parties to test, certify, and approve our products as compostable so we can confidently make that claim and label them accordingly.

**ASTM International is an global organization that develops and publishes voluntary consensus technical standards.**

There are currently three different ASTM standards for compostable products and materials: D6400, D6868, and D8410.

These standards define the baseline requirements for compostability including time frames for disintegration and biodegradation.

**The Biodegradable Products Institute (BPI) is the leading authority on compostable products in North America.**

All products and materials certified by BPI meet ASTM standards for compostability in addition to BPI's own requirements related to eligibility, fluorinated chemicals (PFAS), and labeling.

**Compost Manufacturing Alliance (CMA) is a nationwide partnership of compost manufacturing facilities.**

CMA works proactively to field test compostable products in real-world compost processing technologies.

All of our BPI-Certified products get field-tested. We view CMA Approval as a valuable complement to the lab-based BPI certification.

### European Certifications

These two European certification programs rely on EN 13432 as their baseline compostability standard, which is similar to the ASTM standards used in the US.

DIN CERTCO/TUV Rheinland

TUV AUSTRIA/OK Compost

# How a Product Gets Verified as Compostable

## 1. Lab Testing

Approved labs conduct **ASTM tests** that are repeatable indicators of how products will perform in a “real world” compost facility.

## 2. Certification

**BPI reviews the test results**, adds in their own provisions for fluorinated chemicals (PFAS) and labeling, and grants certification to items that meet the additional requirements.

## 3. Field Testing

**CMA evaluates how our products perform** in real world environments.

More than 340 of our products have been approved by CMA for their performance in specific composting technologies.

Despite the absence of a standard for field disintegration testing, it has become an important data point for composters, particularly as processing technologies and time-frame requirements evolve.

### Composting Technologies:

**CMA-W**  
(Windrow)

**CMA-I**  
(Covered In-Vessel)

**CMA-A**  
(Aerated Static Pile)

**CMA-S**  
(Substrate Acceptance)

## SERVICES

# Product & Zero Waste Specialists

Our Product & Zero Waste Specialists (PZWS) are an unmatched team of in-market experts focused on composting, legislation, and all things waste diversion.

Connect with the PZW from your region

### PZW Duties Include:

#### Operator Engagement

Help waste diverting operators set up and manage their composting programs.

#### Legislation & Policy

Stay up to date on state and local legislation affecting compostable products.

#### Composters & Haulers

Get to know composters and haulers, and support their efforts to collect and process our products.

#### Sales Support

Support broker and distributor sales reps with key operator opportunities.

## Education & Training

Our online learning center efficiently presents category essentials to employees, end-users, procurement teams, or anyone who is eco-curious.

[ECOPRODUCTS.COM/LEARNING-CENTER](https://ecoproducts.com/learning-center)

Study Guides

Videos

Quizzes

Get data specific to your product selection, usage, and end-of-life scenarios

## Custom Product Carbon Footprint Reports

We have the industry's most contemporary Product Carbon Footprint (PCF) capabilities.

To determine the greenhouse gas (GHG) emissions associated with our product impacts, we measure carbon dioxide equivalent (CO<sub>2</sub>e) values by evaluating inputs, outputs, and potential environmental impacts of a product throughout its life cycle.

## Annual Impact Report

Review our Impact Report for Sustainability and Impact-related statements, data, disclosures, and commitments:

3rd party verifications

GHG Inventory (including Scope 3)

Raw materials used to make our products

Product EOL classifications

Waste diversion programs and partnerships

# Contamination Mitigation

CIRC (Controls Intended to Remove Contamination) is a scalable, generator-focused (think Restaurants, Stadiums, Venues, etc.) contamination mitigation program designed to do three things:

- 1. Systematically control contamination** from non-compostable materials.
- 2. Increase composter confidence** in organics streams that contain post-consumer food scraps and certified compostable packaging.
- 3. Demonstrate a systems approach** to contamination mitigation is possible in an array of foodservice environments.

Learn more at [ecoproducts.com/circ](https://ecoproducts.com/circ)

## Industry Engagement

We advocate relentlessly for an organics diversion system that includes food scraps and packaging, and collaborate regularly with organizations from across the country that share our passion.

## State Legislation Overview

A number of state-level regulations affect single-use products like ours. We actively track what is going on around the country to develop solutions and products suited for the ever-changing landscape.

	No-Added PFAS	Mandatory Labeling	Product or Substrate Bans (EPS)	Extended Producer Responsibility (EPR)

## Veda™ Reusable Take-Out Containers

- » Made with heavyweight polypropylene for durability
- » Microwavable and freezable
- » Snapping tab for secure closure
- » Offered in standard foodservice clamshell sizes
- » NSF Certified to meet food protection and sanitation standards
- » Ecolab Ware tested up to 1,000 washes
- » Proprietary barcode tracking and collection technology integrated with leading campus meal plan systems like Atrium and CBORD
- » Real-time collection data for containers paired with OZZI® collection machines
- » Take back program to recycle containers at the end of their useful lives

## How does a reusable take-out container system work?

### Containers

It all starts with containers that are specifically designed for the rigors of reuse programs. Veda containers are NSF Certified to meet food protection and sanitation standards, and are ECOLAB ware tested up to 1,000 washes. Custom embossment and color options are available as well.

### Collection

The best way to ensure high collection rates is to pair Veda containers with the OZZI collection machine – a “smart” collection receptacle that scans containers and credits the user via token or credit for their return. A less “techy” version of the machine called the “Drop ‘N Go” is available as well. Both come with a cart designed to help with wash logistics.

### Tracking

Every Veda container comes equipped with proprietary barcode tracking and collection technology created by our partner, OZZI, that integrates with leading campus meal plan systems like Atrium and C BORD.

### Washing

Once Veda containers are collected, they are either washed on-site or transported to an off-site washing hub, typically via partnership with a “ware wash” service provider.

### Reporting

When Veda containers are used with the OZZI machine, collection data is available free of charge and typically delivered on a monthly basis. Some programs have achieved as high as 97% collection rates!

Use Veda containers with existing dishware collection stations or get collection stats and tracking information with OZZI® collection machines.

**OZZI. Simply Reusable.**

## Veridian™ Collection

» Our curated set of green-tinted and printed products has been designed to comply with legislation in Washington and Colorado.

» The collection includes a full suite of BPI-Certified compostable products including:

- Clamshells
- Cups & Lids
- Cutlery
- Deli Containers
- Salad Bowls & more

## Hot Cups

» Made with PLA-lined paperboard

### CPLA Lids

» Made with crystallized PLA for high heat tolerance  
 » Compostable\*

### Paper Lids

» Lined with PLA  
 » Perforated tab prevents spills in transit then locks back for sipping  
 » Compostable\*

### Fiber Lids

» Made with molded fiber like sugarcane or bamboo  
 » No-added PFAS  
 » Compostable\*

\*Certification varies by product.

# Cutlerease™ Dispensing System

Clean, Hygienic Cutlery

- » The innovative Cutlerease system dispenses clean cutlery one piece at a time.
- » Tape tabs offer easy pick up and loading of cutlery into cartridge without having to touch any part of the cutlery.
- » Handle-first delivery ensures guests touch only the handle of the cutlery they are taking.
- » No trays or levers; helps prevent accumulation and transfer of germs.
- » Compact footprint: <1 ft² for 3:1 space savings over the other guys.
- » Customers can take only what is needed.
- » Customize your cutlery options. Cutlerease is so versatile, you can mix and match cutlery to meet the needs of your business. Need more spoons than forks? No problem.
- » Eco-Products Cutlerease cutlery is BPI-Certified compostable, so it's compatible with Zero Waste Systems.
- » Compostable\*
