

Compostable Collection

Meet the growing demand for sustainable foodservice packaging with our Compostable Collection. Featuring a range of containers, drinkware, carry-out bags, can liners, and back-of-house essentials, these products are designed to help your operation maintain performance standards while supporting sustainability initiatives.

All products featured in this brochure are commercially compostable only and require appropriate commercial composting facilities. Such facilities may not be available in all areas. These products are not suitable for home composting.

Sustainability Partnerships & Certifications

The mark of
responsible forestry

Forest Stewardship Council®

The Forest Stewardship Council (FSC®) promotes responsible forest management through globally recognized forest management and chain of custody certification. Novolex uses FSC Trademark License FSC(R) -C010800 for eligible Chain of Custody certified products manufactured at Bagcraft facilities.

Sustainable Forestry Initiative®

Sustainable Forestry Initiative (SFI®) is a North American forest certification program that includes forest management, fiber sourcing, and chain of custody standards. Eligible Novolex products produced at Bagcraft, Duro, Burrows Packaging, and De Luxe are available with SFI Certified Sourcing or SFI Chain of Custody certification. Novolex uses SFI Trademark License Code 01567.

Biodegradable Products Institute®

Biodegradable Products Institute (BPI®) is North America's leading certifier of compostable products and packaging. Their certification program ensures that products and packaging displaying the BPI logo have been independently tested and verified according to scientifically based standards—ASTM D6400 or D6868 standards. The BPI logo also helps industrial composters know that our products will break down as expected and contribute to production of finished compost.

Compost Manufacturing Alliance™

Compost Manufacturing Alliance (CMA™) verifies that certified compostable products successfully disintegrate under real-world commercial composting conditions. CMA field testing complements laboratory certification by evaluating product performance in participating industrial composting facilities.

American Society for Testing and Materials™ (ASTM)

ASTM International develops voluntary consensus standards used across industries. ASTM D6400 and ASTM D6868 establish requirements for materials and products designed for aerobic composting in commercial or municipal composting facilities, including criteria related to disintegration, biodegradation, and effects on compost quality.

How2Recycle®

How2Recycle® is a standardized labeling system that provides clear, consistent recycling instructions to consumers. Where applicable, labels may include preparation instructions, such as emptying or cleaning the package before recycling.

*Availability of certifications and sustainability attributes varies by product. Refer to individual product specifications for applicable certifications and claims.

Hinged Lid Containers

Flip it, close it, and send it on its way. Choose from a variety of compostable materials and design styles, including durable fiber blend, EcoCraft® Eco-Flute packaging, versatile OneBox®, tamper-evident fry carton, and PLA options. Built to handle everything from crispy fries to hearty entrées, these containers help keep food looking as good as it tastes.

Fiber Blend

Performance Features

- Made without intentionally added PFAS
- Superior strength and stackability for dependable performance under demanding conditions

EcoCraft® Eco-Flute

Performance Features

- Micro-flute corrugated containers help provide insulation
- Enhanced durability and stackability for dependable performance
- Vented design helps preserve food quality by reducing condensation and preventing soggy meals
- The medium layer of Eco-Flute is 100% post-consumer recycled content (PCR) paper, making the clamshell a minimum of 33% PCR

V.I.P. Handle™ Bags

Performance Features

- Made with Variable Inside Patch (V.I.P.) technology for extra security compared to standard handled bags.
- Handles secured on the inside of the bag allow for more printing space and branding on the outside of the bag.
- Sack made with 100% recycled paper.
- Paper options for the bag, handle and inside patch are available and can be customized to meet your performance and pricing requirements.
- Available with premium, semi-extensible paper handle with high tensile energy absorption for heavy loads carried long distances.
