

V.I.P. Handle™ Bags

By Duro

At Novolex, we have your bags handled.

Our new Variable Inside Patch (V.I.P.) technology adds more strength and security to handles and provides additional support when your customers need it most. The V.I.P. Handle bags are strong, allowing for heavier items than our standard handled bags. And, with handles secured on the inside, more printing space is available for branding on the outside of the bag.

Made with **Variable Inside Patch (V.I.P.)** technology for extra security compared to standard handled bags.

- Handles secured on the **inside** of the bag allow for more printing space and branding on the **outside** of the bag.
- Made with 100% recycled paper, they are recyclable, BPI Certified Compostable*, and FSC® Chain of Custody (FSC-C010800) certified.
- Paper options for the bag, handle and inside patch are available and can be customized to meet your performance and pricing requirements.
- Bags are available with premium, semi-extensible paper handles with high-tensile energy absorption for heavy loads carried long distances.

These guidelines are supplied to assist you in determining the proper use of Novolex products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
