

# Pressware<sup>®</sup> vs. Aluminum

While both aluminum and pressware perform well in baking applications, pressware stands apart by delivering more consistent results and enhanced baking performance.

No **dinging** or **denting** during handling

Assembled in the **USA**

Highly **customizable** with various print capabilities

**Microwave safe**

Can pass through **metal detection**

Gentler, more **even heat**

About 85% of product is made from trees, a **renewable resource**

These guidelines are supplied to assist you in determining the proper use of Novolex products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
