

Power Prep™ Wraps and Bags

Made for Grab-n-Go applications. This multi-layered, insulated wrap allows freshly made foods to be wrapped or bagged, frozen, reheated, and held under heat while controlling moisture and temperature to help preserve product quality.

Temperature Ready

Engineered to perform from freezer to warmer, helping maintain food quality through freezing, thawing, reheating, and heated holding.

Moisture Control

A multi-layer, PET-insulated laminate is specifically designed to control moisture and heat while providing oil and grease resistance.

Built Tough

Anti-curl technology keeps wraps flat for faster prep, while the durable construction offers greater puncture resistance than traditional foil or foil-paper wraps.

Specifications

Product Code	Brand	Description	Dimensions (in.)	Material	Color	Case Pack
301167	Bagcraft	Unprinted Power Prep™ Wrap	12.00 x 12.00	PET	White	2,000

These guidelines are supplied to assist you in determining the proper use of Novolex products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
