

Processor PET Meat Trays

Our growing product line is vertically integrated — sheet is extruded, thermoformed into trays and padded entirely in Novolex facilities, and now includes two levels of performance.

Processor Grade Trays

Processor trays have a reinforced rolled rim and are designed to run on existing high speed processor lines with the ability to vacuum skin pack and lid seal. They are customizable with a wide variety of padding options for purge absorption and are also recyclable.

High Performance

Novolex has developed a proprietary blend that resists cracking, breaking and film tears throughout the supply chain, from the packer to the retail shelf. Even our standard clear trays can perform well without cracking, but rigid control of the manufacturing process is absolutely necessary. We perform continuous checks during production to maintain parameters, ensuring the best performance.

These guidelines are supplied to assist you in determining the proper use of Novolex products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
