

# Ice Cream Novelty Packaging

## NOVOLEX™, A LEADER IN PACKAGING FOR THE DAIRY INDUSTRY.

At Novolex Specialty Packaging & Laminations, we understand the critical role of packaging in the dairy industry. As the leader in one-quarter pound stick and one pound butter packaging, we recognize the value of superior machinability and functionality. We have built our business on supplying products that perform through manufacturing and protect your product through consumption.

We understand your products and the quality you expect in the marketplace.

Building on our dairy industry experience, **we are delighted we can extend this knowledge and experience to our ice cream novelty packaging portfolio** to optimize your ice cream novelty packaging needs. Our monolayer or laminated rollstock products are a combination of coatings, laminations, papers and films for all types of ice cream novelties. These are often printed for prototype or daily manufacturing quantities.

Applications include single serve ice cream novelty products such as pops and juice wraps, and ice cream bars, sandwiches, cones and drumsticks.

**Total value, total support, total solutions – that’s our commitment to you.**
