net wt. 12 oz (340 g)

Coffee Packaging Rollstock

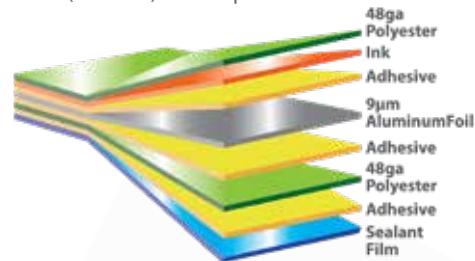

Our coffee packaging rollstock is made from custom flexible multilayer structures that are designed to protect oxygen and moisture sensitive products like ground coffee, coffee beans, coffee creamer and cold brew. We offer a variety of materials and sizes to meet your needs.

Contact your Shields sales representative to learn about solutions for your business.

Retail Pack

For ground coffee or coffee beans packaged in retail packs

- Multilayer structure designed to protect oxygen sensitive products
- Provides an excellent oxygen, aroma and moisture vapor barrier
- Provides hermetic seals (non-peelable) at low heat seal initiation temperatures and a wide heat seal window when compared to conventional blown polyethylene sealants
- Provides excellent seal initiation strength, puncture resistance and dart-impact strength
- Reverse printed for scuff and abrasion resistance
- Available in printed (8 colors) and unprinted versions

Fractional Pack

For ground coffee packaged in pre-measured portion packs

- Multilayer structure designed to protect oxygen and moisture sensitive products
- Provides hermetic seals (non-peelable) at low heat seal initiation temperatures
- Creates a wide heat seal window when compared to conventional blown polyethylene sealants
- Easy tear structure for consumer convenience
- Available in both printed (8 colors) and unprinted versions

2P Structure

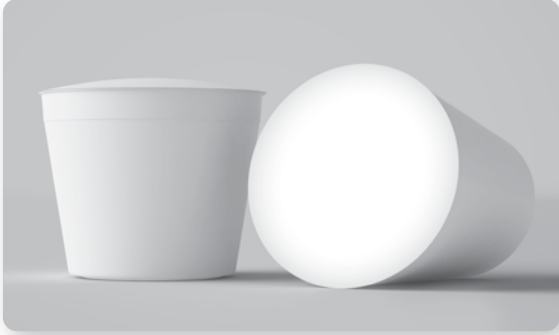

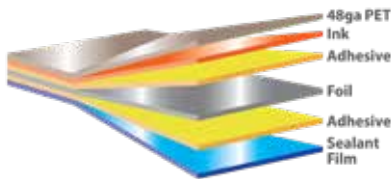

3P Structure
Adds extra MVTR and OTR properties

Cold Brew Coffee Lidding

- Seals to polyethylene based containers
- Peelable seal film designed for low heat sealing applications on equipment requiring higher levels of film stiffness
- Reverse printed flexo up to 8 colors
- Sealant layer is medium density polyethylene film

Creamer Container Lidding

- Excellent grease and oil resistance
- Heat seals at 325°F for 3/4 second at 40 psi
- Typical bond strengths are 800-1200g/inch
- Seals to HIPS, PVDC coated HIPS, CPET, APET, Vinyl, XT Polymer
- Surface printed up to 8 colors with optional over print varnish

Shields produces custom flexible packaging for industrial, food, beverage, agricultural, building and construction, banking and security, chemicals, energy, and consumer markets.

Capabilities include: multilayer extrusion, high definition flexographic print, lamination, high barrier bags for meat, cheese and sauces, mail and courier bags, reclosable zipper, hot fill and chill packaging, bakery and tortilla packaging, Ice bags, roll stock, and stretch hooder products.
