Stretch Hooder Film
Stretch Hooder Film

The three layered stretch hooder film made by Shields® is used to package products ranging from kitchen appliances to corrugated boxes. Automated stretch hoders offer better protection than traditional packaging while reducing packaging costs. Stretch hooder films from Shields has been approved for use on all of the major stretch hooding systems.

Shields is a Novolex™ brand and has been making stretch hooder film longer than anyone else in North America. With deep technical expertise on both the film and the hooder equipment, Shields helps customers develop the best packaging solutions for their needs.

**FEATURES:**
- ISO 22000 / SQF Certification
- High quality products made in the USA
- Co-extruded polyethylene tubing
- Heavy duty proven formulations, utilizing the best polymers in the industry
- Compatible with all major stretch hooding systems
